Re: Cooling system diagram The engine is much newer than the boat, and you have an aftermarket heat exchanger. Can you post a picture that shows the thermostat housing? That will help ID a suitable cooling system diagram. It appears that you have a FULL cooling system, the manifolds are cooled by antifreeze and only the risers cooled by raw water.

Although there is an abundance of free sea water available, marine diesel engines do not use it directly to keep the hottest parts of the engine cool. This is because of the corrosion which would be caused in the cooling water spaces, and the salts which would be deposited on the cooling surfaces interfering with the heat flow.
