- Windows 7, like Windows Vista, eliminates DOS from the installation process completely by supplying its own preinstallation environment called Windows PE 3.0.

Windows PE is a subset of Windows 7 that provides basic access to the computer's network and disk drives, so that it is possible to perform in-place or network

Windows 7. In Windows 7, all the settings are grouped under two categories: "Home or Work" and "Public".

This splits all the network sharing settings in groups according to the three network locations available in Windows 7 (to learn more about network locations, read Lesson 2).
